

06/07/2022 18:51:54 PM from DDOT Host to All Panelists: Friendly reminder to change the "To" field to "All Panelists" if you want to send any messages to the panelist team

06/07/2022 18:52:23 PM from DDOT Host to All Panelists: Caitlin Hughes on FB asks: "How do you mitigate loss of street trees?"

06/07/2022 18:55:43 PM from Michael Alvino to Everyone: For Caitlin's question - where possible, we look to replace trees that are impacted. On this project, we have opportunity to do that on segment 2 between Chestnut and Piney Branch.

06/07/2022 19:01:05 PM from DDOT Host to All Panelists: Caitlin Hughes on FB: "Can you use permeable pavers instead of asphalt on social trails and areas that are not currently paved?"

06/07/2022 19:01:45 PM from DDOT Host to Michael Alvino (privately): FYI Michael your previous message went to Everyone (including Attendees) not sure if that was your intent. If you would like your message to stay internal to the team, select All Panelists

06/07/2022 19:02:49 PM from DDOT Host to All Panelists: Caitlin Hughes on FB: "Will you be able to replace trees taken at a 1:1 ratio or better and can you ensure that the replacements will occur in the same neighborhoods as trees taken?"

06/07/2022 19:04:32 PM from Michael Alvino to Everyone: DDOT uses porous asphalt when necessary to meet Department Of Environment and Energy (DOEE) Stormwater Permit requirements. We will be evaluating the materials in the next phase of design, including required coordination with DOEE. We also factor into consideration long term cost of maintenance and user experience in the design.

06/07/2022 19:05:08 PM from Michael Alvino to All Panelists: Do the FB questions get posted to everyone too, or just the panelists?

06/07/2022 19:05:25 PM from DDOT Host to All Panelists: I've copied Michael's response and replied to Caitlin's 1st question on the FB livestream with the response - I posted them to just the Panelists but I can send to public too if you'd like?

06/07/2022 19:06:04 PM from Michael Alvino to All Panelists: Oh, oops. Sorry. Yes, if you can share the questions to everyone that would be good. Otherwise my responses make no sense

06/07/2022 19:07:02 PM from DDOT Host to All Panelists: I got ya! no worries

06/07/2022 19:07:08 PM from Michael Alvino to All Panelists: thank you!

06/07/2022 19:07:49 PM from DDOT Host to Everyone: Caitlin Hughes on FB asks: "How do you mitigate loss of street trees?" from Michael Alvino to Everyone: 6:55 PM

Where possible, we look to replace trees that are impacted. On this project, we have opportunity to do that on segment 2 between Chestnut and Piney Branch.

06/07/2022 19:08:36 PM from DDOT Host to Everyone: Caitlin Hughes on FB: "Can you use permeable pavers instead of asphalt on social trails and areas that are not currently paved?"

from Michael Alvino to Everyone: 7:04 PM

DDOT uses porous asphalt when necessary to meet Department Of Environment and Energy (DOEE) Stormwater Permit requirements. We will be evaluating the materials in the next phase of design, including required coordination with DOEE. We also factor into consideration long term cost of maintenance and user experience in the design.
